The Hardiest Roses Obtainable

OUR ROSE BUSHES are grown under the most ideal conditions to be found anywhere in the "great outdoors." The soil in our nurseries is composed of the "cream" of the mountains combined with the animal and vegetable decompositions of the plains for ages past. Soil moisture is supplied by a natural sub-irrigation which never fails. A long, sunny growing season tapering off to a fall of gradually lowering temperatures, ripens the plants ready for digging without the artificial drying process which is so devitalizing to rose plants.

Our plants are all budded on a cutting Multiflora Japonica of our own selection which has proven hardier and more vigorous than any other strain in commerce and which produces a rugged fibrous root system practically guaranteeing successful transplanting. We are experienced rose growers and are preceded by three generations of plant propagators.

All those conditions of soil, climate, understock and human understanding, combined with direct producer-to-consumer service, reveal the secret of the success our customers have with our plants. We take this opportunity of thanking our many friends for their spontaneous expressions of satisfaction.

TERMS OF SALE

Cash must accompany orders, with certain exceptions as follows: A 25% deposit will hold an order until one month before shipping date, when full amount of money must be remitted. In the case of horticultural societies ordering for their members, 25% should accompany orders, balance due 30 days from date of invoice.

We can make shipment at any time from about October 15th to April 15th. Prices include delivery, except where noted otherwise.

PLANTING ROSES

PLANTING—If you are not quite ready to plant when the parcel arrives from the nursery, you must take care that the plants do not dry out meantime. Holes should be dug wide enough and deep enough to receive the root system without twisting or crowding. Plant just deep enough to cover the junction of root and stem with one inch of soil. Spread out the roots evenly, giving them a downward tendency, return the soil and tread down firmly. Firm planting is very important, as loose soil dries out quickly, when the plants will be slow to start and may even die. If the ground has been previously dug and manured, manure at planting time will not be necessary, but if not, then the holes should be dug deep enough to receive a forkful of manure in the bottom, covered by an inch of soil to prevent the dormant roots coming in contact with it. Sometimes in spring, cold drying winds prevail after planting, which have a killing effect on newly planted roses, causing moisture to evaporate from the stems which is needed for the production of new growth. We have found that a good safeguard against just such conditions is to cover the newly set plants with sacks and soak with water twice daily; this will make dilatory plants start that would otherwise have died.

PRUNING—As these remarks are primarily intended for the first year, we will content ourselves by just saying that, after planting, all strong branches should be cut to about two inches and the weak ones cut right out.

WINTERING—We have found the best kind of winter protection is to hill up the plant with about six inches of soil. If the plants are in a bed, fill up the depressions made in hillling up with partly decayed manure well tramped down. When the ground is frozen, a covering of cornstalks or such like material may be given to help hold snow over the bed. Climbing roses should have their stems removed from their supports, laid on the ground and covered as above. In spring, roses thus covered must be uncovered before growth starts, but protecting material should be quickly available should severe frosts threaten. Wintering instructions are for the information of growers east of the Rocky Mountains and the colder parts of the United States.

PATENTED ROSES

They are Supremely Satisfactory

Alice Harding. H.T. (Mallerin, 1937.) Plant Patent No. 202. Retails \$1.00 each, \$10.00 per dozen. The masterpiece of the great French hybridizer Mallerin and, incontestably, the best exhibition yellow rose produced. Yet it combines garden qualities rarely found in an exhibition rose—great floribundity and a handsome plant which can be relied on for continuous color. The bud is large, golden yellow flanked with carmine, and the open bloom is of classic form, pure gold, borne singly on long stems, long-lasting, and fading hardly at all; sweet honey fragrance. Blooms produced in great profusion. Gold Medal of American Rose Society, 1936.

Better Times. H.T. (Jos. H. Hill Co., 1934.) Plant Patent No. 23. Retails \$1.00 each, \$10.00 per dozen. The brilliant cerise flowers are large, double, and delicately fragrant. Being produced on long, strong stems, they are excellent for cutting. Foliage is leathery, dark green. A very free, full bloomer.

Blaze. Lc. Plant Patent No. 10. Retails \$1.00 each, \$10.00 per dozen. Acclaimed by the nation as the only hardy, everblooming scarlet climber. Blaze combines the vigor, beauty and hardiness of Paul's Scarlet Climber. Propagated from blooming wood only.

Charlotte Armstrong. (W. E. Lammerts, 1941.) Bud long pointed, blood-red, flower large, double, high-centered and fragrant. Color spectrum-red to cerise. Flowers borne on long stems. Foliage dark and leathery; bush vigorous and compact. This is a good new rose with a future. \$1.25 each.

Countess Vandal. H.T. (M. Leenders & Co., 1932.) Patent No. 38. Retails \$1.00 each, \$10.00 per dozen. The rose of roses! "Countess" has been enthusiastically received by rose-lovers everywhere. Its long-pointed bud, its distinctive shadings of coppery bronze, suffused with gold, and its form are a continuous "movie," developing new beauty at all times during its long life.

Dickson's Red. H.T. (Dickson, 1939.) Plant Patent No. 376. Retails \$1.25 each, \$12.50 per dozen. A glowing scarlet-red rose from the Emerald Isle. The ripe warmth of its color is constant, its abundant bloom unflagging all through the summer. Happily, also, it is rich in the fragrance you instinctively expect in a red rose. If the sun has been cruel to your reds, here is a "must have" for your list—it defies the hottest sun's rays and retains its color undimmed. The blooms are produced singly on long, strong stems; it will be your favorite red rose for cutting. First Award All-America Rose Selection for Hybrid Tea Roses, 1940. Silver Medal Certificate, American Rose Society, 1939.

Eclipse. H.T. (J. H. Nicolas, 1935.) Plant Patent No. 172. Retails \$1.25 each, \$12.50 per dozen. Awarded prizes in Rome, Paris, and other test gardens. Its long, stream-lined bud, enhanced by ornamental sepals, is of rich gold without shading. Petals are large and tough, but not numerous, averaging 20 to 25, with more in the autumn. Gold Medal, American Rose Society.

Heart's Desire. H.T. (Howard & Smith, 1941.) (Plant Patent No. 501.) Retails \$1.50 each, \$15.00 per dozen. Exquisite, small, slender buds of deep red which open to a loose semi-double flower of deep velvety red that does not fade, and has a true rich old-time rose fragrance.

Eternal Youth. H.T. (Aicardi, 1937.) Plant Patent No. 332. Retails \$1.25 each, \$12.50 per dozen. New. The perfectly formed buds are long pointed, colored a beautiful soft pink with yellow at the base of each petal. Half-open, the flowers retain their high center and their rich pink color. The full-open flowers are comfortably double and expose a large center of graceful, deep yellow stamens and there are always some flowers available. We consider this the long-desired pink rose.

McGrey's Sunset. H.T. (McGrey, 1937.) Plant Patent No. 317. Retails \$1.25 each, \$12.50 per dozen. New. A variety which is aptly named. The outside of petals is a clear buttercup-yellow, tipped orange, while the inside is chrome-yellow flushed with scarlet as it opens. The color is intensified as the blooms expand and is at its best when fully opened. Flowers are of medium size, full and shapely, with a pleasing fragrance, very freely borne on strong, upright stems. Very sun-resistant. Excellent in hot weather. An outstanding rose and one much praised in our garden all year. Certificate of Merit, N.R.S., 1936. Silver Medal Certificate, City of Portland, 1939. Silver Medal Certificate, A.R.S., 1939.

McGrey's Triumph. H.T. (McGrey, 1934.) Patent No. 190. Retails \$1.25 each, \$12.50 per dozen. Geranium-red flushed orange, gradually deepening to rich orange at base. The color-tone is even throughout, reminding one of a brilliant ripe strawberry flushed scarlet and orange. The flowers are very large, full, and of perfect shape. In addition to the brilliant and unusual coloring of the flowers, the extraordinary freedom and habit of growth is something far from the every-day rose. The stems are dark mahogany-red, and the foliage is extra large, dark reddish bronze in color, and of great beauty. Awarded the First-Class Trial-Ground Certificate of the N.R.S.; Gold Medal of the N.R.S.; Award of Merit of the Glasgow and West of Scotland Horticultural Society.

Permanent Wave. Floribunda. (M. Leenders & Co., 1934.) Patent No. 107. Retails 85 cents each, \$8.50 per dozen. The name fits the case. The petals are fluted or waved, permanently from the bud stage to the finish. Blooms rather large for the type, in great clusters. Rosy-pink with cerise edges. Handsome plants. May be grown tall enough for a low hedge.

Ruth Alexander. New. Patent No. 178. Retails \$1.25 each. A strong, hardy climber, with glossy foliage and long-pointed buds on long stems, cadmium orange topped peach red.

Climbing Hinrich Gaede. The extraordinarily brilliant orange-vermillion coloring of this striking rose is now found in a climber, and what a climber! Free blooming rose which does not stop with the spring blooming period but continues to produce magnificently colored blooms all through the summer and fall. Plant Patent No. 244. \$1.25 each.

Royal Visit. H.T. (Patent Rights Reserved.) Retails \$1.50 each, \$15.00 per dozen. The color of this rose is most striking as well as pleasing. The outside of the petal is deep Chinese coral; the inside is deep tangerine orange at the base, shading to marigold orange at the outer edge. General appearance is rich orange in the bud and apricot in full flower. The attractiveness of the flower really increases with age as the color is maintained to the last and the petals twist beautifully inward to cover the center; when over, the petals drop cleanly. The bush is a compact, shapely grower, making it ideal for bedding. The foliage is outstanding, large, dark green, glossy and leathery, and most resistant to fungous diseases. This new rose was originated by Eddie's and introduced in 1941.

POLYANTHAS

65c Each; \$7.00 per Dozen

Cameo. A new and distinct color. Shell-pink with salmon suffusion, over which lies a glow of gold. Flowers in large sprays constantly in bloom from June until frost.

Cecile Bruner. D.P. (Introduced by Pernet-Ducher, 1880.) The old favorite sweetheart rose. Small, long-pointed buds, bright pink on yellow ground, borne in clusters. Vigorous, bushy, dwarf. A free and continuous bloomer.

Ellen Poulsen. (D. L. Poulsen, 1912.) Large, full flowers of bright flesh pink, produced in great clusters on a sturdy branching plant.

Else Poulsen. (D. L. Poulsen, 1924.) Semi-double flowers of rosy-pink and carmine. A free and continuous bloomer. One of the best polyantha roses.

Gloria Mundi. (G. de Ruiter, 1929.) Rather large, fully double, lasting flowers of glowing orange-scarlet, borne in clusters. Foliage, abundant, light green, and glossy. Vigorous, bushy plant and abundant bloomer.

Ideal. (J. Spek, 1922.) Small, dark scarlet blooms shaded with black, borne with tremendous profusion in immense, compact bunches. Plant quite vigorous, rather long branching, continually in bloom.

Improved Lafayette. Medium sized, deep glowing red flowers suffused with vivid crimson. Blooms very profusely.

Kirsten Poulsen. (H. T. Poulsen, 1924.) Beautiful bright scarlet with golden anthers. Very showy, single, splendid bedder.

Lady Reading. (Van Herk, 1921.) Clear red small globular flowers. Free flowering and dwarf growing.

Mrs. Finch. Bright rose-pink flowers in branching, fragrant clusters.

Paul Crampel. Flaming orange-scarlet, holding its color to the end. Good in rain or sunshine.

Sparkler. Brilliant red. An improvement on existing reds.

GENERAL LIST

65c Each; \$7.00 per Dozen

Ami Quinard. H.T. 1927. Long pointed, blackish garnet bud opening into a loose, semi-double, fragrant bloom; so dark it seems almost black. A very vigorous bush with fine foliage. A persistent bloomer.

Angele Pernet. H.T. (Pernet-Ducher, 1924.) Brownish-orange blooms of excellent shape, although only semi-double.

Austrian Copper. Intense coppery-red bi-color. Flower single but of striking color.

Autumn. A rose of gorgeous coloring, a combination of scarlet-cerise and gold. Flowers of moderate size and good shape. Growth free and upright.

Betty Uprichard. H.T. (A. Dickson & Sons, Ltd., 1922.) A splendid shade of glowing salmon-pink and carmine; very vigorous; a very fine variety.

Briarcliff. H.T. (Briarcliff Greenhouses, 1926.) Large, pointed buds, and double, high-centered blooms of brilliant rose-pink, fragrant and long lasting. Stems stiff and long.

Caledonia. H.T. (Dobbie & Co., Ltd., 1929.) Bud large, long-pointed; flower large, extremely double, high-centered, very lasting, slightly fragrant, white, borne singly on long, strong stem; foliage sufficient, large, dark green, buds and flowers of exquisite form, large and fragrant. Strong-growing plant, almost constantly in bloom.

Catalonia. H.T. Orange-scarlet. The buds are deep rich carmine stained with orange and open to a 50-petaled flower of glowing orange-scarlet. Richly fragrant. No other rose matches it in color, and it simply glows like a beacon in our gardens.

Chas. P. Kilham. H.T. (Beckwith & Sons, 1926.) Large, beautifully shaped flowers of brilliant orange, suffused with glowing scarlet, slightly fragrant. Foliage resistant to mildew; vigorous, bushy, upright.

Christopher Stone. H.T. Scarlet-crimson. A thrilling rose in every way from the bud stage until the petals drop. It is unsurpassed for intense damask fragrance and seldom shows a trace of blue in the color. This is one of the newer roses that has come to stay, for it is "tops" in the reds for quantity of bloom and vivid color. In the fall it is especially lovely when it takes on more petals, and blackish shadings appear to soften and enrich the scarlet-crimson.

Condesa de Sastago. H.T. (P. Dot, 1932.) The bud is like a ball of gold with brilliant red stripes. When fully open it shows fiery copper on the inside of petals and rich gold on the reverse. The most striking combination of color. Gold Medal International Rose Test Garden, Rome, 1934. Petal count, 45.

Daily Mail Scented. H.T. Dark, velvety red. Good shape. Moderately vigorous bush. This rose gives perfect blooms early in the season.

Dainty Bess. H.T. (W. E. B. Archer, 1925.) Large, single flowers with broad, imbricated petals of pure, soft rose-pink. The large, flat cluster of stamens held above red filaments has a remarkable color effect.

Dame Edith Helen. H.T. (Alex. Dickson & Sons, 1926.) Pure glowing pink, not too deep. A noble flower, large and fragrant, full, of perfect form and opening well in all weathers. Delightfully fragrant. Gold Medal, N.R.S.

Duquesa de Penaranda. H.T. (P. Dot, 1931.) Color, copper-apricot, opening to splendid bloom of coppery-apricot. sweetly perfumed.

Edith Nellie Perkins. H.T. (A. Dickson & Sons, 1928.) Large double flowers with fine-pointed center, inside of petals salmon-pink, outside dark coppery-red and orange. A good grower and bloomer with few thorns and splendid foliage.

Editor MacFarland. H.T. (1929.) Belongs to the Radiance group for vegetation. Long, pointed, pink bud with a glow of amber and a paler edge. Good for cutting.

E. G. Hill. H.T. Crimson. The flowers are large, full, brilliant crimson, and as they come singly on strong, erect stems, are splendid for cutting. Produces richly fragrant, 50-petaled flowers.

Etoile de Hollande. H.T. (H. A. Verschuren & Sons, 1919.) Brilliant red blooms of magnificent size, perfect in half-open state, showing clean, attractive centers when fully open; petals enormous; very fragrant. Plants branching, particularly free-flowering, healthy.

F. J. Grootendorst. (F. J. Grootendorst & Sons, 1923.) Clusters of small fringed, crimson blooms during the whole flowering season. A vigorous bushy shrub, absolutely hardy and constantly in flower.

Feu Joseph Looymans. H.T. (P. J. Looymans & Co., 1922.) Long-pointed buds, resembling those of Sunburst; large, fairly full flower of yellow, with vivid apricot tints, giving it a brilliant effect in the center. Growth strong, straight and bushy.

Frau Karl Druschki. H.P. (P. Lambert, 1900.) Pinkish buds and magnificent snow-white blooms with deep, firm petals, forming a flower of unimpeachable shape, but without fragrance. Plant one of the strongest—grows 4 to 10 ft. high; foliage normal; blooms freely and continuously.

General McArthur. H.T. (E. G. Hill & Co., 1905.) Crimson-scarlet buds and blooms, usually well shaped and very fragrant. The plant is erect, flowering freely in successive crops, with good foliage.

George Dickson. (A. Dickson & Sons, 1912.) Immense, deep red velvety blooms of the most perfect shape; very fragrant. Strong-growing.

Golden Dawn. H.T. (Grant, 1929.) Rich sunflower-yellow flushed with old-rose. Large, full flowers of fine form.

Golden Emblem. H.T. (S. McGredy & Son, 1917.) Intensely yellow buds and blooms of superb shape and texture, borne freely on erect, branching plants with tough glossy foliage.

Golden Pernet (Julien Potin). Perfect flowers of bright yellow. Hardy, free blooming, fragrant. Holds its color.

Hadley. Large flowers of rich crimson, shading to dark red. Very fragrant.

Harrison's Yellow. H. Foet. (Harrison, 1830.) Very hardy yellow rose of exquisite form in the bud, opening to large flowers of deep yellow. Suitable for shrub or hedge planting.

Heinrich Wendland. H.T. (Kordes, 1930.) Outside of petals clear golden-yellow, inside brownish-red. Flowers very large, high-centered and lasting. Good disease-resistant foliage.

Hinrich Gaede. H.T. Multi-colored. Long-pointed, shapely bud of nasturtium-red color. Kaleidoscopic flowers—rich, luminous vermillion, shaded golden yellow. Fruity fragrance.

Hoosier Beauty. H.T. (F. Dorner & Sons, 1915.) Splendid dark red blooms of powerful fragrance. Plant healthy but erratic in growth and not especially free-flowering.

Hugonis Species. (Discovered in China by Father Hugo, 1899.) Single flowers of soft yellow, blooms two inches across. Makes a fine specimen for lawn with its feathery foliage. Fragrant.

Imperial Potentate. H.T. (Clark Bros., 1922.) A firm-petaled bloom of dark, shining rose-pink, shaded lighter on reverse of petals.

Innocence. H.T. (Chaplin Bros., 1921.) Tapering, urn-shaped buds, opening to enormous, single, pure-white blooms adorned with a giant center of wine-red stamens tipped with golden anthers. The plant is strong, branching and healthy, flowering freely.

Irish Fireflame. Single flowers of madder orange shaded crimson. Vigorous and free flowering. Gold Medal, N.R.S.

Isobel. H.T. (S. McGredy & Sons, 1916.) Carmine, flushed orange-scarlet; large flowers freely produced, single; beautiful for bedding, massing or cutting; sweetly scented.

I. Zingari. (H. Foet.) (Pemberton, 1925.) Flower semi-double, vivid orange-scarlet, produced continuously in corymbs. Foliage rich dark green.

Joanna Hill. H.T. (J. Hill Co., 1928.) Bud very large, long-pointed; flower very large, full and long-lasting, darker yellow than Sunburst, borne singly on long stems. Foliage dark green, leathery. Vigorous grower.

K. of K. H.T. (Kitchener of Kartoum.) (A. Dickson & Sons, 1917.) Brilliant scarlet-red buds and open, semi-double flowers and blazing red with a blackish velvet sheen; fragrant. Plants vigorous and extremely free-flowering throughout the season.

Kaiserin Auguste Viktoria. H.T. Cream-white. Long, shapely buds open to full-petaled cream-white, deliciously scented flowers. One of the best roses for cutting.

Katherine Pechtold. H.T. (Verschuren Pechtold, 1934.) Coppery orange, flushed with rose and gold. A vigorous bushy grower with large leathery foliage.

Lady Margaret Stewart. Pern. (A. Dickson & Sons, Ltd., 1926.) Deep sunflower-yellow, heavily veined and splashed with orange-scarlet, reverse of petals deeply marked with carmine; as bloom develops, these shades intermingle, forming in the fully developed flower a beautiful cadmium-orange effect. Free from mildew and blackspot. Very sweetly scented.

Lady Hillingdon. T. (Lowe & Shawyer.) Deep apricot-yellow, long-pointed bud, very free-flowering, tea-scented.

Leonard Barron. H.T. (Conrad & Pyle, 1934.) A rose of Nutkana parentage and, we hope, a forerunner of a new race of roses. The color is salmon-copper blended with shell-pink. The flowers are of immense size and sweetly fragrant. Petal count, 75.

Los Angeles. H.T. (Howard & Smith, 1916.) Very lovely buds and exquisite flowers of salmon-pink, with yellow shading, and very sweetly scented. It blooms well throughout the season.

Mabel Morse. H.T. (S. McGredy & Son, 1922.) Clear, unstained yellow buds and well-shaped, fragrant flowers. Spreading, bushy growth and liberal bloom. Foliage remarkable for its beauty and resistance to disease.

Margaret McGredy. H.T. Orange-scarlet. We have yet to find a more continuously satisfactory, large, full-petaled everblooming rose than Margaret McGredy. The olive-green, leathery foliage is disease-resistant, and the buoyantly vigorous growth insures a constant production of buds and blooms from early in June until hard frost. In the newly opened flower the color is a scintillating orange-scarlet which ages to a pleasing carmine-rose. It has lovely rose fragrance.

McGredy's Coral. (McGredy, 1936.) Coral pink overlaid salmon. The blooms are large, pointed and perfectly formed, and well displayed on long stems; a vigorous, upright-growing rose, producing a continuous display of bloom right through the season. The plant is very vigorous, free and branching; the stems are clothed with abundant dark cedar-green foliage. A graceful novelty. Awarded the First-class Trial Ground Certificate of the N.R.S.

McGredy's Ivory. H.T. (McGredy, 1929.) Creamy-white, of soft and delicate tone that merges into a light yellow base. Free and perpetual flowering. Foliage is a very dark green, which provides a brilliant contrast to the pale-hued blooms which are borne erect on long, stout stems.

McGredy's Scarlet. H.T. (McGredy, 1930.) Flower large, full, fragrant, brilliant scarlet-washed crimson. Foliage dark olive green. Growth vigorous. Certificate of Merit, N.R.S., 1928.

McGredy's Yellow. H.T. (McGredy, 1933.) Large buttercup-yellow, strong upright growth.

Miss Rowena Thom. H.T. (Howard & Smith, 1928.) Enormous buds and blooms of fiery rose and mauve, shaded with old-gold at the center, borne on long, strong stems. A profuse, continuous bloomer and a very vigorous plant.

Mme. Butterfly. H.T. (E. G. Hill Co., 1918.) Fine, light pink buds and flowers tinted with gold near the base of the petals, of exquisite shape and richly perfumed. Plant is strong, throwing up big branching sprays of bloom.

Mme. Caroline Testout. H.T. (Pernet-Ducher, 1890.) Large, globular flowers of satiny-rose, shaded lighter toward the outer edge of its enormous petals; fairly fragrant. Plant strong and persistent bloomer.

Mme. Edouard Herriott. H.T. (Pernet-Ducher, 1913.) Sparkling buds of coral-red and orange, opening to large, semi-double flowers of indescribably brilliant orange-red and salmon. Very persistent bloomer.

Mme. Jules Bouche. H.T. (Croiber, 1910.) White with light cream center. Full and perfectly shaped flowers. One of the best roses for the garden or for cutting.

Mrs. A. R. Barraclough. H.T. (S. McGredy & Son, 1926.) Bright, soft, sparkling carmine-pink, shading to yellow at base. The flowers are full, of huge size, fine substance and perfect form. Foliage is dark green; stems are long and sturdy, carrying flowers perfectly erect.

Mrs. Beckwith. H.T. (Pernet-Ducher, 1922.) Long, deep yellow buds, opening to medium-size, fairly full blooms of strong lemon-yellow, paling to white at edges; somewhat fragrant. Plant is of moderate, erect growth, with healthy foliage.

Mrs. E. P. Thom. H.T. (Howard & Smith, 1926.) Slender yellow buds, large, well-shaped blooms of bright canary-yellow, deepest in center. The plant is of exceptional vigor and blooms very freely.

Mrs. G. A. Van Rossem. H.T. (H. A. Verschuren & Sons.) Large flowers on strong erect stems. Heavy shades of deep orange and apricot on a golden-yellow ground, outside of petals a deep bronze. A new color in roses.

Mrs. Henry Bowles. H.T. (Chaplin Bros., 1921.) Ovoid buds and globular flowers on clear, piercing pink with lighter shades. A fine, firm center, well held and fairly fragrant.

Mrs. Pierre Du Pont. H.T. (Mallerin, 1929.) Bud medium size, long-pointed; flower very lasting, fragrant, deep golden-yellow. Foliage abundant, rich green. Growth vigorous. Gold Medal, Bagatelle, 1929.

Mrs. Sam McGredy. H.T. (S. McGredy & Son, 1932.) A beautiful scarlet-coppery-orange, is heavily flushed with Lincoln red on the outside of the petals, and these colors together give a rich and almost dazzling effect. The delicately-perfumed flowers are of large size and beautiful form. The foliage is a handsome dark reddish-bronzy-green and is mildew-proof.

Ophelia. H.T. (W. Paul & Son, 1912.) Salmon-flesh, shaded with rose and with apricot heart, perfect shape and habit, sweetly scented. Very beautiful and popular.

Oswald Sieper. H.T. (M. Krause, 1933.) One of the finest white roses. Beautifully formed buds opening to large double flowers of creamy-white carried on long stout stems. A good exhibition rose. Petal count is 35.

Phyllis Gold. (H. Robinson, 1935.) Golden yellow, well-formed blooms with high center; strong, stiff petals. Growth vigorous and upright. Olive green foliage with black thorns. One of the best yellow roses ever introduced. Gold Medal, N.R.S.

Picture. H.T. (McGredy, 1932.) Clear velvety rose-pink with full flower, perfectly formed. An ideal rose for the garden or for cutting.

President Herbert Hoover. H.T. (L. B. Coddington, 1930.) Bud large, long-pointed; flower large, semi-double, very lasting, fragrant, medium orange except two outside petals which fade to lighter shade. Foliage leathery, disease-resistant. Growth vigorous; free-bloomer. Gold Medal, International Flower Show, New York, 1929.

Radiance. H.T. (J. Cook, 1908.) Brilliant rose-pink buds, opening to well-formed shining flowers with lighter tints on the reverse of the petals. This plant makes wonderful growth and has splendid blooming qualities.

Rapture. H.T. (Traendly & Schenck, 1926.) Fine, pointed buds and blooms of glowing pink. Plants strong and free-flowering.

Red Radiance. H.T. (Gude Bros., 1916.) An even better rose than its parent; Radiance in habit, bearing big globular flowers of deep rose-red on strong, individual canes which are freely produced all summer.

Rev. F. Page-Roberts. (B. R. Cant & Sons, 1921.) Copper-red buds of great length opening to golden-yellow blooms stained outside with red, fully double. Strong branching plant with healthy foliage.

Roselandia. (W. Stevens, Ltd., 1924.) Typical Ophelia buds and blooms of rich golden-yellow, fragrant and free-flowering. Excellent foliage and habit.

Shot Silk. H.T. (A. Dickson & Sons, Ltd., 1924.) Cherry-red overshot salmon-orange, flushed rose and deeply veined, clear buttercup-yellow at base. Dark green foliage. A handsome bedding rose.

Sir Henry Segrave. H.T. (A. Dickson, 1932.) Primrose-yellow with chrome base. Very large, full and pointed. Growth vigorous and free. Gold Medal, N.R.S.

Soeur Therese (Sister Therese). H.T. Yellow. Long-pointed buds are chrome-yellow, heavily marked with carmine; the open flower is rich daffodil-yellow and holds its color well. Sweetbriar fragrance. The blooms come freely on splendid cutting stems.

Southport. H.T. (McGredy, 1933.) Brilliant scarlet. The flowers are large, full, of fine shape and up to exhibition size. The growth is vigorous, upright and very perpetual blooming. Gold Medal of the National Rose Society.

Souvenir de Claudius Pernet. Pern. (P. Pernet-Ducher, 1920.) Clear yellow flowers, very large and full. Free-flowering, vigorous, brilliant green foliage.

Star of Persia. Foetida Hybrid. (J. H. Pemberton, 1919.) Bright yellow flowers, single, about three inches across, with petals prettily fringed at edges. The plant is strong growing and is good as pillar rose or low climber.

Sylvia Leyva. (P.) New geranium lake, base of petals yellow, opening bloom passing to rose. Vigorous, erect growth, foliage bright dark green. Profuse and continuous in bloom. A reliable and bright bedding variety.

Syracuse. H.T. (Mallerin, 1930.) A large full double scarlet crimson flower with slight fragrance, lasting long on the plants. One of the most desirable red roses. Moderate grower and heavy bloomer.

Talisman. H.T. (Montgomery Co., 1929.) Bud medium size, long-pointed, richly colored; flower medium size, double, long-lasting, extremely fragrant, golden-yellow and copper, borne singly on long stem. Growth vigorous. Foliage large, dark green.

Ulrich Brunner. H.P. (F. Levet, 1881.) Large, fairly full flowers of bright carmine-red, cup-formed, and very fragrant. Strong, erect, smooth-wooded bush with large foliage. Blooms profusely in early summer.

Ville de Paris. H.T. (Pernet-Ducher, 1926.) Round buds of clear yellow and big globular flowers of the same hue, untouched by any other color. Plant is notably tall and wiry and the foliage dark, small and very leathery.

CLIMBERS

Price 50c Each; \$5.00 per Dozen

Cecile Brunner. A vigorous climbing sport of the well-known "Sweetheart Rose."

Dr. Van Fleet. (Dr. W. Van Fleet, 1910.) Pale pink buds and flowers equal in form and size to the finest Hybrid Teas; borne on long, individual stems. The plant makes enormous thorny canes and produces thousands of flowers.

Etoile de Hollande. (H. A. Verschuren & Sons, 1919.) Brilliant red blooms of magnificent size, perfect in half-open state, showing clean, attractive centers when fully open; petals enormous; very fragrant. Plants branching, particularly free-flowering and healthy.

Golden Emblem. A climbing type of the well-known bush rose. The rose is flecked yellow and carmine edges, glossy mildew-proof foliage.

Hadley. (Teschendorff, 1927.) Climbing sport of Hadley.

Lady Hillingdon. A climbing sport of the well-known and popular bush of the same name.

Los Angeles. A climbing sport of the well-known bush variety.

Mrs. E. P. Thom. Climbing sport of the well-known bush of the same name.

Paul's Lemon Pillar. Pale sulphur-yellow, good size and form. A fine pillar rose.

Paul's Scarlet. (W. Paul & Son, 1916.) Intense pure-scarlet, semi-double flowers in clusters. During the flowering season the plants are a wonderful sight. Makes a wonderful pillar or pergola rose.

President Herbert Hoover. (L. B. Coddington, 1930.) Bud large, long pointed; flower large, semi-double, very lasting, fragrant, medium orange except two outside petals which fade to lighter shade. Foliage leathery, disease-resistant. Very vigorous grower and free-bloomer.

Reveil Dijonnais. Pern. Golden-yellow shaded carmine. Large semi-double flowers. A pillar rose of great beauty.

Shot Silk. A climbing sport of the bush of the same name. Exceptionally good.

Talisman. (Montgomery Co., 1929.) Bud medium size, long-pointed, richly colored; flower medium size, double, long-lasting, extremely fragrant, golden-yellow and copper, borne singly on long stem. Growth vigorous. Foliage large, dark green.

*At the New York World's Fair the famous rose garden used Vigoro exclusively for two years.
